- **QUIETER RIDE**
- **FUEL EFFICIENCY**
- **WEAR RESISTANCE**

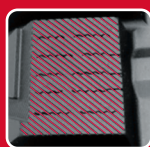

iceGUARD G075

DESIGNED FOR THE FIERCE WINTER AHEAD

The new iceGUARD G075 crossover and SUV winter tire is the latest addition to Yokohama's iceGUARD family line. This winter tire is designed to deliver exceptional performance on all rough and tough Canadian winter roads. The combination of ice and snow traction, low rolling resistance, and resistance to wear, which makes for a quieter ride. The G075 is equipped with all new directional tread design, high density compound, 3-D triple sipes and with all new low-heat generating under tread, drivers will be ready for any condition winter brings.

High Density Reinforced Compound
The high-density compound allows for a more stable tread block, providing optimized road contact and longer even wear.

Micro Diagonal Grooves
Micro diagonal grooves deliver optimum ice performance even without a break-in period.

3-D Triple Sipes
The surfaces of 3-D sipes avoid uneven deflection of blocks by supporting each other. It delivers excellent ice and snow performance with its maximized actual contact area.
